## Marine Gel

## LEAVING THE OTHERS IN THEIR WAKE

## DEEP

Marine applications are wide and varied with many durability \& power demands placed firmly on the batteries shoulders.

## HAZE MARINE GEL

 always delivers when you need it, whatever your DC requirement in extreme situations.

Tough ABS case with DUAL MARINE TERMINALS as standard - this battery is made to start the engine and run your equipment.

GEL TECHNOLOGY delivers cranking amps, general power and long/deep discharges without the need for immediate recharge. LONG CYCLE LIFE and resistance to the elements.

Gel Charging - To obtain maximum cycle life from your Marine Gel battery it is important that a suitable charging profile is used.
For information about the Haze range of chargers and the Haze recommended charging profile contact your local Haze distributor.
NOTE: All Haze Gel batteries are true Gel batteries, plate chemistry is specifically for cyclic applications, the microporous polymer gel separator and the gelling agents are European made and imported specially for Gel production.

HAZE MARINE GEL delivers maximum capacity within approximately ten cycles and keeps delivering long after the others have sunk to the murky depths. HAZE R\&D has resulted in SPECIAL CHEMICAL and PROCESS technology to ensure consistency and performance.
